

IS JESUS REALLY PRESENT IN THE EUCHARIST?

**Eucharistic Miracles - bread changes to flesh and blood
What does science have to say?**

**TWO SYDNEY WORLD YOUTH DAY PRESENTATIONS
THAT YOU SHOULD NOT MISS**

PART 1 - Wednesday 16th July 2008 at 2 pm to 4 pm

A highly acclaimed short film on the Eucharist will be shown which explains the Church's teachings and introduces Eucharistic miracles through history

Australian Journalist Mike Willesee and Lawyer Ron Tesoriero, (author of the book *Reason to Believe*) who produced the film will talk of how the scientific research of a modern day case of a Eucharistic miracle in Argentina and the "blood of Christ" lead them to make the film.

Discussion after the film:

- Implications for our understanding of the Eucharist
- The future scientific work on comparison of the DNA with blood on the Shroud of Turin and other relics of the crucifixion

The priest from Argentina, central to the miracle, will be present to give his testimony

PART 2 - Thursday 17th July 2008 at 7.30 pm to 9.30 pm

Science and Faith

Eucharistic miracles today, do we need them ?

Presentation by Dr Ricardo Castanon, a former atheist and University Professor of Neuropsychology, on his research into modern cases of Eucharistic miracles and the consequences for society, science and religion. He is the author of many books and lectured extensively throughout the world on the brain and human behaviour
